Prince O MBA MLSecOps

10X Artificial Intelligence Engineer specialized in Generative AI & Agentic AI Orchestration | Building and Deploying Scalable Production Grade AI SaaS & LLMs (LLMOps) | Transforming Workflows with Autonomous Systems

United States

Summary

Hi this is Prince!

Artificial Engineer specialized in Generative AI | Architect of Autonomous Agentic AI Systems & Production-Grade AI SaaS /LLM Products

I don't just build models let me say that again I don't just build models; I architect, deploy, and scale intelligent systems that redefine what's possible. My expertise is in transforming theoretical AI into robust, revenue-generating SaaS products and orchestrating complex multi-agent ecosystems that automate critical business workflows from end-to-end and solve critical business problems. If your challenge involves pushing the boundaries of LLMs, Multi-Agent AI, and LLMOps.

What I Deliver:

- ✓ Architected & Scaled Autonomous Multi-Agent Systems that reduced operational overhead by 25% by automating complex, multi-step workflows
- ✓ Productionized LLM and AI SaaS Applications from concept to secure, monetized SaaS features, implementing rigorous LLMOps pipelines that boosted model accuracy by 34% and slashed inference costs by 21%.
- ✓ End-to-End Ownership of AI Products, taking ideas from zero to one for ten live products serving 50K users, ensuring >99.9% uptime and seamless integration.
- ✓ Automated High-Value Workflows by integrating AI agents with enterprise APIs, resulting in \$750k in saved annual operational costs and freeing human talent for strategic innovation.

Technical Expertise & Stack:

I wield a deep toolkit with a bias towards scalable, maintainable infrastructure:

AI/ML Frameworks: PyTorch | TensorFlow | Hugging Face |
LangChain | AutoGen | CrewAI | n8n

☁️# Cloud & MLOps/LLMOps: AWS (Sagemaker, Bedrock) | GCP
(Vertex AI) | Azure AI | Docker | Kubernetes | MLflow

Programming: Python (Expert) | SQL | Bash | FastAPI | Django

Core Concepts: Deep Learning | NLP | Reinforcement Learning |
Agent Orchestration | Software Architecture | CI/CD for ML

I Am Seeking:

I am actively exploring visionary opportunities to leverage my skills in building the next generation of autonomous AI, while owning End to End deployment and operationalization of ML/LLM systems

Target Roles: Artificial Intelligence Engineer | Agentic AIOps
Engineer | Machine Learning Architect | LLMOps Engineer |
Solutions Architect (AI/ML)

Target Companies: AI-first startups, scale-ups, and technology
leaders (MAANG/MAMAA) that are solving complex problems with
generative AI and multi-agent systems.

Open to: Full-Time Roles | Contract Consulting for Complex AI
Projects

Experience

Jagaban Flow AI
Artificial Intelligence Consultant
March 2025 - Present (8 months)

upwork
Generative AI / Machine Learning Consultant
September 2024 - Present (1 year 2 months)

JPMorganChase

3 years 7 months

Artificial Intelligence - Machine Learning Engineer

January 2023 - Present (2 years 10 months)

Artificial Intelligence - Machine Learning Data Scientist

April 2022 - January 2023 (10 months)

Machine Learning Engineer

January 2024 - Present (1 year 10 months)

Capital One

3 years 2 months

Security, Risk and Governance Lead

January 2020 - April 2022 (2 years 4 months)

Risk Manager

March 2019 - January 2020 (11 months)

NORTHEDGE IT LTD

Splunk Enterprise Security Engineer

April 2020 - December 2020 (9 months)

Oyato & Company

Founder

May 2015 - August 2017 (2 years 4 months)

Washington D.C. Metro Area

Education

Stanford University School of Engineering

Professional Certificate, Machine Learning Specialization

University of Rochester - Simon Business School

Master of Business Administration (M.B.A.), Brand Management, Marketing Management, Organizational Strategy, Brand Development, Market Research

University of Maryland School of Pharmacy

Doctorate of Pharmacy, Pharmacology and Toxicology; Pharmaceutical
Science; Pharmaceutical Design and Delivery

Temple University

Bachelor's of Science, Chemistry
